

Fascia Vents

Over Fascia Vents allow a constant flow of air into the roof void between the felt and fascia board. The 10mm vent is suitable for conventional cold roofs and the 25mm vent is suitable for warm roofs, flat roofs and for roof pitches below 15°.

Over Fascia Vents featuring our unique SlideLock Technology enabling rapid installation with secure continual ventilation. Allows an air stream in to the roof void between the felt and fascia board. Pieces are 500mm with interlocking male and female ends to allow for a continuous length.

Installation:

The over fascia vents should be positioned directly on top of and fixed to the fascia board through the nail holes using corrosion resistant nails. The subsequent units should be fixed together with the slide & lock mechanism and fixed continuously along the eaves.

Dimensions:

10mm Vent 1m long x 38mm wide x 20mm deep
25mm Vent 1m long x 42mm wide x 30mm deep

Packaging:

10mm - 60 Per Box
25mm - 50 Per Box

Material

Polypropylene
